Project

Fundraiser for Support for Teachers in Early Career

Even though most schools had virtual learning, Belk continued their support and opportunity for nonprofits to raise money through ticket sales and Alpha Phi participated in three such drives. We raised money to be given to new career teachers as mini-grants as soon as we are able to visit schools and get applications from teachers. This has been successful in previous years and teachers who received this support then provided a program on their project. This year we raised in the three drives approximately \$1,000.
