## Chapter Program & Projects

### Program

#### **Forest Kindergarten**

**Jeana Stewart of Red Bank Elementary school shared the Forest Kindergarten outdoor program. It is a hands-on approach to learning. The program is limited to 20 students who spend the majority of their day learning their letters, and doing math and science all outdoors. They use sticks and mud to write and make letters and count. Ms. Stewart talked about how the young students begin to notice the world around them. Outdoor time is not canceled due to wet or cold weather. They don their rain boots and coats and head outside every day. What a great way to learn!**
