Program Project Icebreaker

Title:

Feminine Hygiene Kits for Healing Hands, International

Summary:

Beta Upsilon Chapter in conjunction with Rho Chapter and women of the community met to work on assembly and packaging of feminine hygiene kits to be sent to girls and women in Africa. During periods of menstruation many girls are impeded from attending school or work and are often confined to home because of a lack of options for feminine hygiene needs. The project focuses on the construction of washable, reusable fabric pads that can easily be attached to underwear. The kits contain safety pins, underwear, a washcloth, soap, and 12 reusable pads in a cloth, drawstring bag.
