Title: What's Happening in Our County?

Summary:

Kappa Members met with local community member Ben Marks. Mr. Marks is a longtime business owner and community leader. After a short talk about his various role within our community, we had great discussions about how educators can help the business worlds in Benton & Henry Counties as well as how the business world can help educators prepare students for the real world. We learned what skills the business community sees that are lacking from recent graduates. We also learned about scholarship, internship, and apprenticeship opportunities available within our communities.
